

Exodus 3: 11-17

Hello everyone how are you? This is Carlton Banks I'm sure many of you know who I am because this is a personal message sent to the Morgan crew! I know you are wondering why I have that angel and that biblical citation above. The angel is the guardian angel that protects us and guides us in our daily lives.

I will let the citation speak for itself but I'm here trying to gather you old folks together. It's funny we get to call ourselves the old folks now. I know you are in disbelief but just ask your children? That's who we are to them our hair is turning from black to sprinkled pepper or maybe all grey. Well welcome to the club you old fart.

I want to tell you about my personal life and family. I was born and raised in NY until the tender age of 11. My brother and I was sent to live with our great grandmother and grandmother, my grandfather passed away when I was 10. My brother and I were sent for two reasons:

- 1) we would be company for my grieving grandmother who had to live alone.
- 2) It was the perfect opportunity to get my brother and I out of New York City.

Thus we were moved to a small rural town in North Carolina. My brother and I could'nt get into trouble down there even if we wanted to. Plenty of open space, woods every were when the lights went out at night you could not even see your hand in front of you unless the moon was out and the stars was shining bright at night. Wild animals constantly passed through our yard on their way to feed in the woods. When it was night time you came in the house for safety. You never know what could have stumbled upon you, fox, bear, deer, wild turkey a wolverine they all sounded like monsters to me. Boy old boy this was a different world for me I didn't have be the person I was in New York (a city slicker, I was to young to be big & bad) now I had to watch out for something that could eat me alive!

I was raised by my great grandmother and my grandmother and I was exposed to some serious old time teaching. I mean real old times! My great grandmother was just one generation from slavery her mother was born into slavery and it ended when she was 5 years old.

I want you to go back in time with me to a time when it was against the law for our people to learn how to read and write. My great grandmother taught me to read and study biblical scriptures because she said that is how messages were passed to one another during those harsh times. She made sure I read certain books, chapters and verses of Exodus and a few other books in the bible. She told me that this is what her mother passed down to her when she was a child and that she should continue to do the same for future generations. The messages they talked about in the bible and the spiritual songs they sang were all coded with information. We must relearn what those codes were because they are rich in history. I asked my granny why we needed to do this and she told me I would know when the time came. Well I guess the time has finally come and now I am sharing it with you. I need you to read between the lines and get the message of the biblical scripture quoted above.

Carlton Banks, CSA
Certified Senior Advisor

- Registered Securities
Principal Financial Industry
Regulation Authority
(FINRA).
- Founder / Managing Member
GlobalFinet, LLC. Parent co.
of Global Financial Network

I have my foot in the door of one of the most powerful organizations in the world “Financial Industry Regulation Authority” (FINRA)

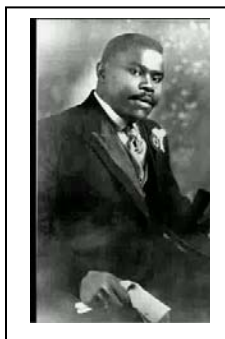

some of the richest men and woman (Bill Gates, Warren Buffet, Meg Whitman just to name a few) in America belong to this exclusive group. The financial power that FINRA has knows no boundaries it's arms reach from continent to continent. The license that they grant touches the heart of America's financial system. It's a license to make money and its authority is granted from the Federal Government.

I am looking for a serious group of people willing to sacrifice and take on the responsibility of moving the African American Financial agenda forward. I want to think out of the box and try something new. It's a new Financial concept to use Wall Street to pool Black, White and other dollars for the economic development of Black America. Once the SEC gives its approval to raise capital from the general public it creates a financial resource that African Americans have never experienced. This opportunity is within our reach right now let's GO FOR IT!

What's in it for you a comfortable retirement and the opportunity to own a piece of Black America's most largest and powerful companies. The reward is like winning the jack pot of the mega millions drawing only that this jack pot is worth BILLIONS. Its plenty of it to go around and plenty to share. No African American has really ever harvested the Black dollar in the 21st Century. Our time has come. This is no get rich quick scam, its tried and true investments with ourselves, our businesses and our future here in the US. The money that our celebrities make (in entertainment, sports and music industries etc.) you can put them all in a group what they make in a year Wall Street makes in a DAY. The first Black person that went down this road was Marcus Garvey he sold the first Black stock in America for his Black star Line.

He raised millions of dollars at a time Mr. Charlie felt that Black people were all poor. We can do the same today and invest it in something that will benefit us our children, grand children and future generations. Time is short. This is the last time you (Baby Boomers) will be able to do this. We can't wait another decade or quarter century because we will be too old living on a fixed income and trying to survive off Social Security.

Now is the time take advantage of it and shine the light for the next generation to see! The only thing I need you to do is register with my company Globalfinet, LLc the parent company of the Global Financial Network and Globalfinet.com. I have been writing a few commentaries on Walter Fields Northstarnews.com check them out it will break down into parts the when how and what of investing in our community. This is what my organization will be about and its vision. You can go to my website www.Globalfinet.com to register and get addition information. I'm asking you to help support me in this endeavor because no one person can save Black America. We have to do it together. For those of you that want to join and be a part of the organization go to www.globalfinet.com.

Sincerely,

Carlton Banks
